

## Products

HPLC / microHPLC / CE detector

First Laser Induced Native Fluorescence Detector

integrating a 224 nm laser

Volatile Organic Compound analyzer

Multi-Purpose Air Analyzer

Designed around the capillary electrophoresis instrument

P/ACE MDQ Beckman-Coulter, the VOC analyzer performs

detection, identification and quantification of compounds

in suspension in air.

Oil-Fog detector

Water analyzer

Based on Ultraviolet Resonance Raman Scattering, the Water

analyzer is designed to detect, identify and quantify compounds

in water.
